## Competition Entry System on Shorttrackonline.info

Since 2006 the website Shorttrackonline.info is running the International Online Entry System for shorttrack competitions. In this Online Entry System clubs can enter their skaters for the registered competitions. During the past years the Entry System has been used for hundreds of competitions all over the world and the International Skating Union is using it for the special ISU Online Entry for World cups and ISU Championships.

The Online Entry System can be used for competitions of all levels and any format from World-championships to Club competitions. The Club secretary gets an username and password for entering skaters and making reservations. Federations get from the ISU a special password for entering national teams for World cups and ISU Championships.

Advantage of using the system is that the procedure is for all competitions the same, that no mistakes occur in names and birthdates of skaters due to manually typing and that it is easy to make changes in entry. Besides this all recent skaters results (necessary for the make-up of the races) is available in the database. Additional information about requests for transport, ice training, meal voucher reservation, ISU-declaration and visa forms can also be processed.

Competition Organisers and Competitors Stewards can, with a special password, follow the entry day by day and after the closing date download all data necessary for the competition as excel sheet or as import file for the Winsport competition software.

The Online Entry System is an efficient way of entering skaters for competitions, it minimalize manually made mistakes and gives good visibility which competitions are open for Entry. For questions and information about the Online Entry System you can contact: jpbmob@live.com.
