

## Winsport Software for Shorttrack Competition Administration

The competition administration is the heart of the organisation. Winsport Software is specially made for shorttrack competition administration. It is made for competitions of all levels and is following all ISU regulations.

The software is a helpfull tool for the make up of competition-schedules, qualifying tables, make-up of the races and result-processing. The software is continuously under development since 1982 and in use by Competitors Stewards all over the world.

It can be used stand alone or in case connected with a Photo Finish system for automated result processing. It works perfectly together with all functions of the website Shorttrackonline; like the Competition Entry System, Results upload, Ranking lists and Statistics.

If you are interested you can attend one of our Winsport Clinics for Competitors Stewards which are planned on the following dates:

06-08-2019	Oberstdorf	(GER)
23-10-2019	Bergamo	(ITA)
13-11-2019	Lausanne	(SWI)
	Almere	(NED)
	Epinal	(FRA)

More clinics in other countries are in planning. Or request for information on the following address: Email: [jpbmob@live.com](mailto:jpbmob@live.com)
