

## **Frequent Asked Questions: About results on website**

**I competed in a competition of which the results are not on the website. Can you put my results on the website and in the ranking list?**

Unfortunately this is not possible. If we have to put manually the result of one skater into the database this will take a lot of time to do and then we have to do this also for all skaters who request this. Besides this we then have to investigate if these results are correct and we have to check if it was skated in an officially sanctioned competition. This is almost impossible to investigate for every request. The results of competitions on our website are the results of competitions which are officially uploaded (in a special format) to us by the Competitors Steward of that competition. If the competition you skated in is not on the website you have to contact the local organiser or the Competitors Steward of that competition and ask them to send the results in the correct format to the website [Shorttrackonline.info](http://Shorttrackonline.info), or contact us.

**There is a mistake on the website in the results of a competition I skated. Can you change that for me?**

If there is a mistake in your results you have to contact the local organiser or the Competitors Steward of that competition. Only the Competitors Steward can change mistakes in the results of a competition and upload the complete and corrected results again to the website [shorttrackonline.info](http://shorttrackonline.info).
